### **Space and Naval Warfare Systems Command Awards Contract**

SAN DIEGO – General Dynamics C4 Systems, Scottsdale, Ariz., is being awarded a \$40,000,000 modification to a previously awarded firm-fixed-price and cost-plus-fixed-fee contract (N00039-10-C-0069) for the development and integration of software enhancements to the Digital Modular Radio (DMR). These software enhancements include the development and integration of the Integrated Waveform and Mobile User Objective System waveform into the DMR

This contract includes options which, if exercised, would bring the cumulative value of this contract to an estimated \$277,661,982.

Work will be performed in Scottsdale, Ariz., (80% percent), Linthicum, Md., (20% percent) and is expected to be completed by July 2015.

Contract funds will not expire at the end of the current fiscal year.

This contract was not competitively procured, because it is a sole source acquisition. General Dynamics C4 Systems developed the Digital Modular Radio hardware components, operating software, waveform generating software, radio control software and the cryptographic algorithm generating software for the embedded cryptographic modules in the radio. Thus, General Dynamics C4 Systems is the only qualified manufacturing source with the knowledge and technical expertise to modify the existing source code.

The Space and Naval Warfare Systems Command, San Diego, Calif., is the contracting activity.
