Space and Naval Warfare Systems Command Awards Contract

SAN DIEGO – Northrop Grumman Systems Corp., San Diego, is being awarded an \$80,000,000 indefinite-quantity, indefinite-delivery contract (N00039-13-D-0010) for Next Generation Command and Control Processor (NGC2P) Technology Refresh and Link 22 development. The contract addresses obsolescence issues in the current NGC2P system and supports system capability enhancements and new capability insertion, such as Link 22. The contract is acquiring software and hardware system development, engineering services and Technology Refresh Field Change Kits. The contract includes a single five-year ordering period and a two-year option period. The option period, if exercised, would bring the cumulative value of this contract to an estimated \$95,000,000.

Work will be performed in San Diego and is expected to be completed in December 2017. If options are exercised, work could continue until December 2019.

Contract funds will not expire at the end of the current fiscal year.

This requirement was solicited using full and open competition via the Space and Naval Warfare Systems Command E-Commerce Central website and the Federal Business Opportunities website, with three timely offers received.

The Space and Naval Warfare System Command, San Diego, awarded the contract on behalf of its organizational partner, the Program Executive Office for Command, Control, Communication, Computers and Intelligence.
